How To Use The UV Wand

◆ The Programmable Nano Wand is powered by a 4.5V AC adaptor or 3 C Batteries.

5

a) AC adaptor not included
   Input: AC 120V/60 Hz
   Output: DC 4.5V, 1.2A

b) Battery operations:
   Programmable Nano Wand uses 3 C batteries (not included)

◆ To operate the unit: Press the "Mode" and "On/Off" button together and hold for 2 seconds, the unit will turn on and the LCD displays "00:00".

◆ Select a sanitizing time: The Programmable Nano Wand is programed to offer users 6 different sanitization times; press the "Mode" button to scroll through times.
   -10 seconds   -20 seconds
   -40 seconds   -1 minute
   -2 minute   -5 minute
   Press "Mode" one time for 10 seconds, twice for 20 seconds, three times for 40 seconds…………, 6 times for 5 minutes, the LCD will display 00:10, 00:20, 00:40 …. 05:00 respectively

6

◆ Start to sanitize: Press the "On/Off" button , the LCD will Flash 3 times then unit starts to work for sanitizing, please hold the Programmable Nano Wand between ¼" and 2" from the surface you want to sanitize it will turn off automatically after the selected sanitizing time.

◆ Note: If unit is left idle and no selection is made for 5 seconds it will automatically turn off and you will need to restart the sanitization time selection process.

◆ Turning off the unit: If an immediate stop of the unit is needed during a sanitization scan please press the "On/Off" button and hold for 2 seconds, the unit will shut off.

◆ Safety Switch: The Programmable Nano Wand is designed with a safety switch inside, this prevents children from playing with it and shining the UV light into their eyes. The unit will not work when it is facing up; this is normal and means the safety switch is working.

7

Dust Mites Fleas & Lice Eggs

◆ For king size mattress slowly slide the Programmable Nano Wand over the mattress for 5 minutes.

◆ This action will transmit sufficient energy to kill all dust mites, flea and lice eggs. We recommend you vacuum your bedding afterwards. Repeat this procedure monthly for 3 months.

   - Warning: dust mites can by spread by a poor quality vacuum as they become airborne.

◆ For pillows and animal beds use wand for 1 minute vacuum and repeat monthly for 3 months
